FEATURE PAGE

Spider india offers school website design solutions that are built around you. our design options are endless and ensure that you get the look, layout, and features that work for your school community. let our design team create a site that enhances your brand and helps you stand out.

NEWS & CALENDAR

News and blogs can serve multiple purposes for a school—from sharing inspirational success stories to keeping current families informed of important matters.

FORMS

Paper forms are the bane of most parents existence. Easy & user friendly forms that school uses to interact with the parents, vendors and other allies.

CALENDAR

The life of a school is often found in its calendar. Weekly, monthly, and special events engage students and families to define the flow & spirit of a school.

STUDENT INFORMATION SYSTEM (SIS)

This is the big elephant in the room for most of the school websites. A Student Information System (SIS) is the lifeblood of any school looking to manage data well. Choosing a platform that offers integration with your website without forcing you to use a limiting web authoring tool of their own is so important. Most SIS platforms are acutely aware of the needs of schools for website integration, they just don't all give the same development attention to these features.

LOCATION & CONTACT DETAILS

Whether families are visiting for an PTA Meeting or trying to call to report an absence, make sure you provide a centralized location for contact and location details.
